TREND SKIN HUNGER

In the last few months, the **need for physical contact**, hugs and caresses has increased with social distancing recommendations.

All this has intensified the desire to care of ourselves and to find different forms of cares (and cuddles): the so-called “**self-cocooning**” which is a part of the beauty routine.

TREND PERSONAL CARE BOOM

Moments dedicated to our “self” gain importance, as well as perfumes and rituals for our body which help us **take a break**.

In fact, taking care of our body helps us feel better and be not only **physically** but also **mentally healthy**.

Now, “how you feel” is more important than “how you look”.

and unmissable,
